

The legend continues

They've always held pride of place in your garage – and over the years, have given you plenty of great memories. Iconic models like the Suzuki PE175 that many riders cut their teeth on in the 70's and 80's. And who could forget the trusty Suzuki RMX250 that dominated the trails in the 90's?

Now the legend continues with the launch of Suzuki's latest world-class off-roader, the RMX450Z. Descended from our most popular and well-respected motocross bikes, this hard-core trail-blazer shares the core technology of the high-performance, championship-winning RM-Z450 motocrosser. Its aggressive styling, lightweight frame, advanced suspension, and potent fuel injected 4-stroke are nearly identical. And with the addition of electric start and lights the RMX450Z is trail-ready and ideal for endurance-based riding.

So make room for the new legend. There are plenty of good memories still to come!
